

Plate 3. 'B' Sandstone Isopach Map

Tongue River Member, Fort Union Formation

Contour Interval = 50 ft

WELL SYMBOLS

- Location Only
  - Oil Well
  - Gas Well
  - Dry Hole
  - Injection Well
  - Coaled Methane Well
- Approximate outcrop edge of the top of the Lebou Member, Fort Union Formation

POSTED WELL DATA

- Gross Thickness 'B' Sandstone
- 50 to 100 feet
- Greater than 100 feet

REMARKS

Channel edges are not easily determined because of the gradational nature of the sandstone and the fact that the sandstone grades laterally into thinner muddy sandstones; therefore the zero contours (channel edges) were not identified.
