

John Nelson 7/12/90

**Thickness of Ellis Group (Middle Jurassic),
and "worm's eye" geologic map of units that overlie
unconformity at base of Ellis Group**

- Well used as control point
- Geologic contact
- - - Pre-Jurassic fault; ball and bar on pre-Jurassic downthrown side. Dashed where inferred or approximately located.
- Contour line; thickness of Ellis Group in feet. Contour interval 50 feet. Omitted where control lacking.
- A—B Line of section, figure 35.

- [Js] Swift Formation
- [Jr] Rierdon Formation
- [Jpb] Bowes Shale member, Piper Formation
- [Jpf] Firemoon Limestone Member, Piper Formation
- [Jpt] Tampico Shale Member, Piper Formation basal sandstone in Tampico
- [Jn] Nesson Formation
