

Montana Bureau of Mines and Geology
Open File Report 220

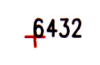

Dissolved Solids in the Judith River Formation and equivalent rocks

By
Thomas W. Patton, Robert N. Bergantino
Brenda C. Sholes, and Joan B. Alexander

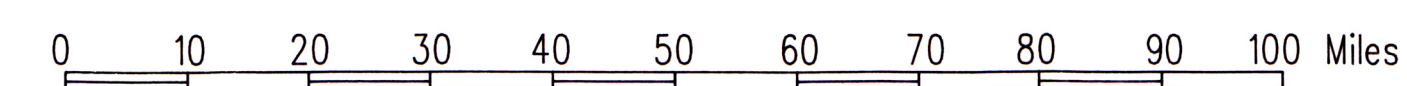

1989

Data selected from Judith River Formation
analyses contained in electronic databases
of the Groundwater Information Center;
Montana Bureau of Mines and Geology; Butte,
Montana. Data Sources include USGS and MBMG
field inventories and published reports.

 Area where the Judith River Formation is
absent or unimportant as an aquifer

 Sample site with dissolved-solids
concentration in milligrams per liter

Scale: 1/1,000,000
One inch = 15.8 miles

Prepared in cooperation with the
Montana GIS Project
Montana State Library
